MHA Program Student Handbook 2 updated 8/24
Welcome

Welcome to the dynamic and challenging world of Health Administration.

Health care is a progressive and dynamic field offering a wide variety of career opportunities. Health services organizations are looking for individuals with the training and qualifications needed to manage the diverse aspects of the health enterprise and to guide its continuing evolution.

The Graduate Program in Health Administration at the University of Florida provides a high-quality educational experience that prepares well-qualified and motivated individuals to work in various management positions in healthcare organizations. We have an outstanding faculty, a rigorous and well-designed course of study, friendly and capable staff, a network of successful and talented alumni, and close ties to the field of practice. Moreover, the Graduate Program in Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME), and the department is a member of the Association of University Programs in Health Administration (AUPHA).

We seek intelligent, hard-working students committed to developing the depth and breadth of managerial skills needed to help organizations respond effectively to the rapid changes and challenges in the healthcare field.

This Student Handbook has been assembled to assist you as you progress through the program. It includes many instructions and forms to complete your degree requirements. Please review this academic year’s University of Florida Graduate Catalog and Student Guide. This is essentially your contract with the University. And don’t forget to use our website to view new information. You are responsible for completing all academic requirements by the deadline dates and times established by the University. You may obtain the published information regarding these deadlines each semester from the program and the UF Graduate School in Grinna Hall.

Our very best wishes as you embark on this new career stage. We stand ready to assist you in every way we can. Please do not hesitate to consult with any of us as questions and issues arise.

MHA Program Faculty and Staff
Department Overview

The Master of Health Administration (MHA) Program is offered by the Department of Health Services Research, Management & Policy, which has degree programs at both the master's and doctoral levels. In addition to the MHA, the Department offers the PhD in Health Services Research (HSR), a full-time doctoral program that prepares individuals to study the healthcare system as a whole; health services research is a multidisciplinary field of inquiry that examines the organization, delivery, and financing of health services. Finally, the Department offers a population health management concentration within the University of Florida's Master of Public Health (MPH) program.

IMPORTANT DATES

**FALL 2024**
- Thur., Aug. 22  Classes Begin
- Mon., Sept. 2   NO CLASS – Labor Day
- Fri., Oct. 18  NO CLASS – Homecoming
- Mon., Nov. 11  NO CLASS – Veterans Day
- Mon., Nov. 25 – Fri., Nov. 29 NO CLASS – Thanksgiving Break
- Wed., Dec. 4   Classes End
- Dec. 7 – Dec. 13 Final Exams

**SPRING 2025**
- Mon., Jan. 13  Classes Begin
- Mon., Jan. 20  NO CLASS – MLK Holiday
- Sat., Mar. 15 – Sat., Mar. 22 NO CLASS – Spring Break
- Wed., Apr. 23  Classes End
- Sat., Apr. 26 – May 2 Final Exams
- Fri., May 2 – Sun., May 4 Commencement
MHA Program Overview

The Master of Health Administration Program at the University of Florida is a two-year, 57-credit program, which is on-campus and full-time, with approximately 20-25 students in each cohort. All students enter the Program in the fall semester, then take a required sequence of courses in the fall and spring semesters for two years, with a required internship in the summer between the first and second years. The Program was established in 1964, with the first class graduating in 1966.

MISSION STATEMENT

The UF MHA program prepares early health administration careerists for management and leadership roles through a dynamic curriculum to improve health services delivery.

VISION STATEMENT

The UF MHA program will be a preeminent educator of leaders who develop innovative solutions for complex health services delivery systems.

VALUES

Our students develop the intellectual resources and skills that can help our graduates do good and address today’s complex health problems and strive to impart the following values:

**Integrity**: Upholding the Highest Standards, Always.

**Professionalism**: Commitment to Quality and Respect in Every Interaction.

**Excellence**: Pushing Boundaries, Striving for Distinction.

**Continuous Learning**: Evolving Through Knowledge, Empowering Growth.
UF MHA PROGRAM COMPETENCIES

All students in the MHA Program are expected to develop and improve competencies across four domains during their studies. Competencies are the essential knowledge, skills, and other attributes expected of Program graduates.

Competency Attainment Level Review:
- Level 1: Know/Understand
- Level 2: Perform/Complete
- Level 3: Lead/Teach

Healthcare Environment and Community
- Perform needs assessments and environmental analyses in support of program and organizational development. (HEC-1).
- Analyze and synthesize government policies, laws, and regulations that affect the healthcare environment. (HEC-2).

Healthcare Organizations and Performance
- Propose, develop, and defend strategic approaches to operational effectiveness based on quantitative and qualitative evaluations. (HOP-1).
- Understand the social determinants of health and how they can affect the design, delivery, and outcomes of programs and services. (HOP-2).
- Incorporate principles and tools of human resource management, organizational behavior, and change management to achieve organizational goals (HOP-3).
- Understand and articulate the role of health information systems for administrative and clinical functions, including issues that may impact patient care, data privacy, and systems security for the enterprise. (HOP-4).

Business Analysis and Techniques
- Describe project management techniques and systems-thinking to plan and manage initiatives involving significant resources, scope, and impact. (BAT-1).
- Assess multiple dimensions of financial performance to measure and improve the financial viability of healthcare organizations. (BAT-2).
- Evaluate and make recommendations for clinical and organizational performance using statistical and qualitative management techniques and procedures. (BAT-3).
- Apply health economics concepts to the analyses of pricing, service demand, and risk (BAT-4).

Leadership and Professionalism
- Organize a team with balanced capabilities and effective group processes to create team member accountability for collective results. (LP-1).
- Apply effective and appropriate oral and written communication skills. (LP-2).
- Assess individual strengths and weaknesses and engage in continual professional development. (LP-3).
- Model professional behavior, values, and ethics (LP-4)
REQUIREMENTS
All full-time students enter the MHA Program in the fall semester and then take a required sequence of courses for two years in the fall and spring semesters, with a required internship in the summer between the first and second years. The MHA curriculum has been designed to meet current developments in healthcare management, CAHME accreditation criteria, Council on Education for Public Health accreditation criteria, and the Program, Department, and College mission, goals, and objectives.

First Year
First-year coursework concentrates on developing knowledge, analytical, and problem-solving skills in health administration. Each course applies the material to complex healthcare organizations. Instructors use various learning methods to introduce concepts, sharpen skills, and apply principles to the healthcare environment.

Summer Internship
During the summer between the first and second years of the Program, students serve as interns in various healthcare facilities throughout the nation. Internships provide opportunities to apply skills and knowledge learned in the classroom to the practice of healthcare management. These applied experiences strengthen students’ competence in the critical activities of the field of health administration. Although the structure of the internship will vary depending on the nature and needs of the organization and the intern’s skills, a typical internship will include observation and participation. Observation would consist of attending meetings, interviewing or shadowing key personnel, and watching interactions between the Preceptor and other staff members. Participation often involves a project being assigned to the intern. Projects allow the intern not only to learn and develop but also to contribute to the organization actively.

Second Year
Second-year coursework is designed to hone students’ knowledge and skills. Coursework emphasizes the specific challenges material to the healthcare industry. The second year of study includes the Capstone Course, which all MHA students must complete and pass to graduate.

Professional Skills
Seminar The Professional Skills Seminar (often called Seminar) is a required course that takes place every semester for both first and second-year students. This course aims to bridge MHA graduate coursework and the practice world, focusing on developing leadership, career planning, and professional skills.

Fellowship/Employment
In the second year, students are assisted in finding a fellowship or job placement. UF’s extensive national and international alumni network generates opportunities in the sector, organization, and location best suited to a student’s strengths.

**INTERNSHIP IN HEALTH ADMINISTRATION**

**Purpose and Structure of the Internship**

The internship is an integral part of the MHA, in which students can apply concepts and skills learned in the classroom to the practice of healthcare management. After the first two semesters of coursework, students complete an internship during the summer semester, followed by coursework in the final two semesters. Students are expected to work full-time for at least ten weeks from approximately mid-May to mid-August during the summer semester.

Although the structure of the internship will vary depending on the nature and needs of the organization and the intern's skills, a typical internship will include observation and participation. Observation would consist of attending meetings, interviewing or shadowing key personnel, and watching interactions between the Preceptor and other staff members. Participation often involves a project being assigned to the intern. Projects allow the intern not only to learn and develop but also to add value to the organization.

Students are strongly encouraged to work with their Preceptors to select internship activities to strengthen competence in appropriate areas. The Preceptor and the student should utilize ongoing assessment information to modify activities during the internship. After the internship, Preceptors are asked to submit a written assessment of the student's performance on the Evaluation by the Preceptor Form.

The internship also has an academic component; therefore, students enroll in a five-credit course for the summer semester. The primary requirement of the course is that the student prepares an MHA Internship Portfolio. The Portfolio serves as 1) a guide to self-assessment of achievement of the MHA competencies, 2) a compendium of documents demonstrating accomplishments during the internship, and 3) an opportunity for professional development.

**Key elements include:**

- A Resume
- Internship Plan
- Weekly Journal
- Organizational Assessment
- Project Summaries
- Internship Summary
College of PHHP Overview

GUIDING STATEMENTS

Purpose

Advance and integrate education, research, and service to meet ongoing and emerging local, regional and global health challenges.

Mission

We shape tomorrow’s public health and health professionals through dynamic and responsive educational programs, transformational research, groundbreaking discoveries, and equitable health-related service. Our collaborations within the College and beyond advance the breadth of knowledge, the quality of science, and the attainment of professional distinction.

Vision

We will excel in developing and delivering innovative, sustainable solutions to pressing health-related challenges for the greater good of individuals and communities in Florida, the nation, and the world.

PHHP Values

• Collaboration
• Diversity & Inclusion
• Excellence
• Integrity
• Respect
• Social responsibility
• Wellness

ORGANIZATIONAL STRUCTURE

The College comprises the dean’s office, nine departments, and eleven centers. The dean’s office administers the health science and pre-PH tracks; the pre-OT track is administered jointly by the dean’s office and the Occupational Therapy Department. The dean’s office and the Department of Speech, Language, and Hearing Sciences jointly administer the CMS program.
## ACADEMIC PROGRAMS

The college’s commitment to excellence in health education is reflected in the various available bachelor’s, master’s, and doctoral programs.

Important Information for Students

1. Students must have a minimum 3.0 cumulative GPA to graduate from the Program.

2. Make sure you know all forms required by the program and the Graduate School during your program, e.g., certification of all degree requirements and application for degree form. Students are responsible for ensuring all forms are completed and submitted to the appropriate offices by the deadlines indicated.

3. THE CORRECT TITLE OF THE DEGREE: Master of Health Administration (MHA)

4. EXIT SURVEY AND INTERVIEW: The MHA program conducts an exit interview with graduating students. The exit interview aims to elicit feedback about the MHA program from the student’s perspective and gauge the program’s strengths, opportunities for improvement, and growth. Each student is also e-mailed an online program evaluation survey to be completed before the group exit interview. While the evaluation survey allows the student to give anonymous feedback, the group exit interview gives the student a forum to discuss the program’s overall effectiveness and brainstorm suggestions for improvement. This is an essential process in the development of the program, and student attendance and participation are expected.

5. Review the Graduate Catalog, [http://gradcatalog.ufl.edu/](http://gradcatalog.ufl.edu/), which includes information on your rights, responsibilities, and procedures you need to follow to ensure all requirements for graduation are completed.

6. Before you graduate, you are responsible for checking your file in the Graduate Student Records Office (106 Grinter Hall) to ensure any previous grade changes have been made, incompletes are resolved, and your supervisory committee form is correct.

7. Information for currently enrolled students, including academic calendars and deadlines, is available online at the Graduate School Website: [http://graduateschool.ufl.edu/](http://graduateschool.ufl.edu/).

VERY IMPORTANT: Ignorance of a rule or deadline does not constitute a basis for waiving that rule or deadline. Use your resources to ensure you know what to do to have a successful and smooth academic experience.
STUDENT HONOR CODE

Preamble: In adopting this Honor Code, the students of the University of Florida recognize that academic honesty and integrity are fundamental values of the University community. Students who enroll at the University commit to holding themselves and their peers to the high standard of honor required by the Honor Code. Any individual who becomes aware of a violation of the Honor Code is bound by honor to take corrective action. Student and faculty support are crucial to the success of the Honor Code. The quality of a University of Florida education is dependent upon the community acceptance and enforcement of the Honor Code.

The Honor Code: We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity by abiding by the Student Honor Code.

On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied:

“On my honor, I have neither given nor received unauthorized aid in doing this assignment.”

(1) All students are required to abide by the Student Honor Code.

(2) The conduct set forth hereinafter constitutes a violation of the Student Conduct Code. Those adjudged to have committed such conduct shall be subject to the sanctions provided in Rule 6C1-4.016, F.A.C.

For more information, visit the Student Conduct Code or The Orange Book.

REQUIREMENTS FOR SATISFACTORY PROGRESS

GRADES

The only passing grades for graduate students are A, A-, B+, B, B-, C+, C, and S. Grades of B-, C+, and C count toward a graduate degree if an equal number of credits in courses numbered 5000 or higher have been earned with grades of B+ and A, respectively. Grade points are not given for S and U grades; S and U grades are not used to calculate grade point averages. All letter-graded courses are eligible to count toward the graduate degree, except 1000- and 2000-level courses, which are used to calculate the cumulative grade-point average.

For more information, go to Graduate Catalog < University of Florida (ufl.edu)
INCOMPLETE GRADES
Grades of I (incomplete) received during the preceding term should be removed as soon as possible. Grades of I carry no quality points and become punitive after one term. All grades of I must be removed before a graduate degree can be awarded.

UNSATISFACTORY PROGRESS OR UNSATISFACTORY SCHOLARSHIP
Any graduate student may be denied further registration if progress toward completing the program becomes unsatisfactory to the academic unit, college, or Dean of the Graduate School. Unsatisfactory scholarship is a failure to maintain a B average (3.00) in all work attempted. Students need an overall GPA of 3.00, and graduate students also need a 3.00 GPA in their major (and in the minor, if a minor is declared) at graduation. Students with less than a 3.00 GPA may not hold an assistantship or fellowship.

LEAVE OF ABSENCE AND READMISSION
Students who wish to take a leave of absence from their academic program for two or more consecutive terms must obtain prior written approval from their academic units. Students who wish to skip a single term will be scheduled automatically for a registration appointment for one additional term. Graduate students who do not enroll at the University for two consecutive terms, including any summer term, must reapply for admission to the same or a different program. Readmission, however, is not guaranteed and is subject to space availability at the appropriate level, college, or major.

Readmission applications are available from the Office of Admissions, P.O. Box 114000, University of Florida, Gainesville, FL 32611-4000 or online at https://admissions.ufl.edu/apply/readmission

GENERAL INFORMATION

GATOR 1 CARD
You must obtain a Gator 1 card, your photo identification badge. The badge can be obtained through ID Card Services Health Science Center Branch in Room NG-10. For more information, see http://www.gator1.ufl.edu/idcard/location.asp. Ensure you take your college acceptance letter, driver’s license, or other picture identification. You must always have your Gator 1 card in the Health Science Center/Shands Hospital complex when involved in student activities and the library because some library services are limited to Health Science Center personnel and students.

GATORLINK ACCOUNT
Students must have an active Gatorlink e-mail account, which is used for college and course-specific correspondence. You are responsible for the content of all college correspondence sent via e-mail. We will not send e-mail to any other account. Do not forward your mail from an outside account (e.g., AOL, Netscape, etc.) to Gatorlink. Please set up your e-mail system so our correspondence goes directly to the Gatorlink account. http://www.gatorlink.ufl.edu/
SOCIAL MEDIA GUIDELINES, POLICIES AND PROCEDURES

Social networks provide fun and exciting ways to connect with others with common interests. However, we have social media policies and guidelines to protect individuals and our institutions.

The social media guidelines and policies help ensure that all communications coming from or purporting to come from UF Health represent our commitment to patient-centered care, where the patient is at the heart of everything we do, and quality is Job 1. This is why we require that employees contact UF Health Communications about any social media sites, blogs, or videos they plan to make that might be construed as representing UF Health in any way.

Even when using social media personally, we would like to remind students that reasonable precautions must be taken to indicate that the activity is conducted as a private person and not as an employee or representative of UF Health.

The guidelines for UF employees and students can be found here: https://webservices.ufhealth.org/policies/

UF Health Communications can offer employees guidance on appropriately and creatively expressing their pride in working for UF Health. They can be reached at 273-5810

HIPAA TRAINING

All students in the College of Public Health and Health Professions must complete HIPAA online training and sign a HIPAA Confidentiality Agreement by the mandatory orientation of the student’s term of admission. In addition, students must complete HIPAA every year they are in the program. Please keep a copy of your HIPAA compliance documents. Students who are not compliant will have their records flagged immediately. The college will drop all classes of students remaining non-compliant by the end of the second week of classes. Please note: even if you have completed HIPAA at another institution, such as Shands Hospital, you must repeat the online training and sign another confidentiality agreement. HIPAA Training and Confidentiality Statement can be found at https://privacy.ufl.edu/uf-health-privacy/confidentiality-statement/. Please upload the signed confidentiality statement in the assignment folder in Canvas.

E-LEARNING

The University of Florida utilizes an online course management system called e-learning (Canvas). These course management systems are Internet-based programs where all course materials will be housed. The course log on site is https://elearning.ufl.edu/. You will need a Gatorlink name and password to log on. Courses do not open until the first day of the semester. For student tutorials & FAQs, visit: [https://elearning.ufl.edu/student-help/student-help-faqs/](https://elearning.ufl.edu/student-help/student-help-faqs/)
HEALTH ADMINISTRATION STUDENT ASSOCIATION (HASA)
Health Administration Student Association (HASA) is a graduate student organization committed to professional development and networking in the healthcare industry. https://hsrmp.phhp.ufl.edu/students/hasa/

LIBRARY INFORMATION
https://guides.uflib.ufl.edu/HSRMP

RECOMMENDED HELPFUL INFORMATION
Health Economics https://scholar.harvard.edu/files/mankiw/files/economics_of_healthcare.pdf or

EXPENSES
In addition to the usual tuition, books, and supplies, you should anticipate the expenses listed below:

- Photo identification badges
- Laboratory fees
- Vaccinations
- Health insurance
- Hand-outs and materials for classes and presentations
- Required computer hardware and software
- Meeting attendance

HEALTH REQUIREMENTS
PHHP REQUIRED IMMUNIZATIONS DOCUMENTATION
- On or Before Admission (as specified by UF and academic program policies), students must submit documentation of the following to the University Student Health Care Center:
  - Varicella (chickenpox) or medical documentation of a protective antibody titer
  - Negative Tuberculosis Test within the past 12 months
  - UF immunizations, including Measles/Mumps/Rubella; Hepatitis B, Meningococcal Vaccine (for Meningococcal Meningitis)
    (Students may sign a waiver for Hepatitis B and Meningococcal unless the program requires one or both, as noted below)
- Annually:
  - Influenza (flu) vaccination – all students must receive a seasonal influenza vaccination when the annual flu vaccine becomes available to UF students. Documentation must be provided to your academic program. Students should consult their programs for specific timing.
  - Negative Tuberculosis Test for all programs in which students provide clinical service to patients (these programs are identified under additional immunization requirements by academic program below; currently, these include OT, PT, Clinical Psychology, and SLH programs) – students should consult their programs for specific timing. Documentation must be submitted to the University Student Health Care Center.

BIOTERRORISM
If you find something suspicious during the class day, please notify the dean’s office or your instructor. Do not attempt to open or remove the material.
SMOKING AND TOBACCO

Smoking and tobacco use (including e-cigarettes and vaping) are prohibited in all facilities and areas of the University of Florida campus, with no exceptions. For more information, click on the following link: http://regulations.ufl.edu/wp-content/uploads/2016/02/2022.pdf.

CELL PHONES

Audio ringers on cell phones must be DEACTIVATED before entering the classroom. Cell phone use is not permitted during class time unless stated by the instructor.

RESOURCES FOR INTERNATIONAL STUDENTS

The UF International Center helps non-US students, faculty, scholars, and their dependents with immigration, admissions, orientation, academic and personal counseling, emergency assistance, community relations, and student activities. It also liaises between faculty, staff, and non-university agencies.

For more information, visit its website by clicking this link: UF International Center.

UF International Student and Scholar Services (ISSS), part of UF Academic Affairs, helps the campus community with immigration matters. It provides services to international students, scholars, and their dependents: admission, orientation, academic and personal counseling, emergency assistance, community relations, and student activities. It also liaises between faculty, staff, and non-university agencies.

For more information, visit ISSS at The Hub on the UF campus or call (352) 392-1345.

COMPUTER REQUIREMENTS

Notebook Computer Requirement for MHA Students:

- All students must comply with the University of Florida Computing Requirements, effective the date of matriculation.
- All students must have a Gatorlink account.
- All students must have a laptop computer to complete all coursework and curriculum requirements within their designation program in the College of Public Health and Health Professions.
- Please visit the UF Bookstore for academic pricing on notebook computers, Microsoft products, and other computer software and accessories.

ADDITIONAL INFORMATION

- Students are responsible for knowing how to operate their computer and its software. Many software guides are available to help students become more proficient with their software. The University of Florida has various options available; see http://www.it.ufl.edu/training/ for more information. Students must have access to e-mail and a reliable internet connection with the ability to send and receive attachments.
- Individual courses may require additional specialized software. In such a case, the faculty member ensures the software requirements are delineated on the course syllabus.
• Students are responsible for providing faculty with appropriate hard copies of computer-generated materials if required for the course assignment. Students are responsible for the cost of printing these materials.
• Students are responsible for any repair necessary to their notebook computers. They are expected to complete assignments in a timely manner regardless of the state of repair of their individual notebook computers.
• Students may be responsible for computer upgrades throughout their curriculum completion.
• As is the case for non-computer-based assignments, all work completed on the computer must be the student’s original work. Students may not receive assistance completing computer-based assignments unless allowed explicitly as part of that assignment. Copying material from others, such as scanning in others’ work, copying others’ files or disks, downloading materials from other sources, and claiming it as the student’s work, is strictly prohibited.

CAMPUS FACILITIES

HPNP COMPLEX

Most of your classes and the administrative areas for your programs are located in the HPNP Complex. The Public Health and Health Professions, Nursing, and Pharmacy colleges share this state-of-the-art, wireless facility. The building is located at 1225 Center Drive, Gainesville, FL 32610. The HPNP Complex has four floors, with the ground floor and a section of the first floor representing common space. The upper floors house college-specific personnel, with Public Health and Health Professions occupying the east wing, Nursing the middle section, and Pharmacy the west wing.

Class Locations: All classes will be in the HPNP Complex or Communicore Building. To assist you in finding your classes, the layout is as follows:

• All classrooms assigned on the ground floor begin with the letter G. All classrooms on the first floor begin their numbering with a 1.
• The numbering continues from east to west, with all rooms on the east side of the building (the Public Health and Health Professions side) beginning with a 1, the central part (Nursing) starting with a 2, and the west side (the Pharmacy side), beginning with a 3. For example, if your classroom is scheduled to be in G300, your classroom location is on the ground floor on the west side of the building.
• The auditorium (1404) is located in the far west part of the building and has a reception area with tables below it on the ground floor, allowing you to study and eat. Vending machines and a student bulletin board are in the reception area.

MHA Student Lounge: The MHA Students can access the Graduate Student Lounge in the Communicore Building.
Student Services Center: The Student Services Center is located in the center section of the ground floor of the Reitz Union Building.
Other Services: Vending machines, a bulletin board for posting notices, and the student reception area (west side of the building). Additional vending machines are located on the ground floor on the east side of the building (College of Public Health and Health Professions side).

LIBRARY

The Health Science Center Library system is one of the largest health science center libraries in the United States. It is located on the first, second, and third floors of the Communicore Building. You must have your Gator One
Card in the library because some library services are limited to Health Science Center personnel and students. A computer lab is also on the second floor for conducting literature searches.

Hours:  
Monday – Thursday 7:30 am – 11:30 pm  
Friday 7:30 am – 7:00 pm  
Saturday 8:00 am – 5:00 pm  
Sunday 1:00 pm – 11:30 pm

Holiday schedules are posted on the library door and published in the independent student newspaper, The Florida Alligator. For additional information, check the brochures available at the library.

BOOKSTORES

The bookstore/convenience store for the Health Science Center is located in the Medical Sciences Building near the Post Office on the ground floor. This bookstore carries texts for HSC courses and is open Monday – Friday, 8:00 am - 5:30 pm.

COMPUTER LABS

Academic Technology provides six computer lab areas for all University of Florida students, faculty, and staff. To use our facilities, you must have a valid GatorLink account. More information about the computer lab hours can be found at https://labs.at.ufl.edu/about-at-labs/lab-hours/.

TEACHING CENTER

The Teaching Center assists students with written communication skills, such as developing and organizing papers, building vocabulary, grammar, and study skills, and GRE preparation. The center is located in S.W. Broward Hall. For more information, call 392-2010.

STUDENT HEALTH CARE CENTER AT SHANDS/UF HEALTH

The Student Health Care Center at Shands is a satellite clinic of the Student Health Care Center located on Stadium Drive on campus. Student Health at Shands offers various clinical services, including primary care, women’s health care, immunizations, and pharmacy services. The clinic is on the Dental Tower's second floor in the Health Science Center.

For more information, contact the clinic at 392-0627 or check out the Website at http://shcc.ufl.edu/.

COUNSELING CENTER

The University Counseling Center on Radio Road offers a wide range of services to assist students with academic, career, or personal questions and concerns. Services include individual and group counseling and therapy, workshops on various topics, such as building math confidence, managing stress, and developing effective study skills, and services related to career development. For more information, contact 392-1575 or check out the Website at http://www.counseling.ufl.edu/cwc/.

CAREER CONNECTIONS CENTER

The Career Connections Center provides career planning and employment assistance for all students and alumni. The center offers various seminars on interviewing techniques and resume preparation. In addition, the center contains an extensive library of career options and data on economic trends and
facilitates recruitment activities for various businesses. The Career Connections Center is located on the first floor of the HPNP Building or in the Reitz Union. Contact (352) 392-1601 for more information or visit https://career.ufl.edu/.

**FOOD SERVICE**

- The hospital cafeteria and other food vendors are located on the first floor of Shands Hospital.
- The Sun Terrace is located in the courtyard near the Health Science Center Library entrance and offers a variety of items, including Einstein Bros., Chick-fil-A, and Starbucks.
- The Reitz Union, located on Museum Road, offers a variety of restaurants, including Pollo Tropical, Subway, Starbucks, and Panda Express, among others.

**POST OFFICE**

A post office is located on the ground floor of the Medical Sciences Building near the bookstore. Hours are Monday – Friday, 8:00 am – 3:00 pm.

**PARKING**

Parking facilities are minimal. Therefore, you must park in the assigned area when registering your campus vehicle. Parking decals are available through UF’s Traffic and Parking Division on the corner of Gale Lemerand Drive (formerly North-South Drive) and Mowry Road. (https://taps.ufl.edu/)

**GRIEVANCE PROCEDURES**

The University of Florida is committed to treating all members of the university community fairly regarding their personal and professional concerns. A formal grievance procedure exists to ensure that each graduate student is given adequate opportunity to bring complaints and problems of an academic nature, exclusive of grades, to the attention of the University administration with the assurance that each will be given fair treatment.

A grievance is dissatisfaction when students think that any condition affecting them is unjust or inequitable or creates unnecessary hardship. Student grievances may arise in scientific misconduct, sexual harassment, discrimination, employment-related concerns, and academic matters. The University has various mechanisms available for handling these problems when they arise, and it can sometimes be confusing for the student to know where to turn. It is generally desirable to settle grievances informally rather than initiate a formal grievance. Communication is the crucial element. When a grievance issue arises, the student should speak with either the supervisory committee chair or the department graduate coordinator. If neither of these individuals is available, the department chair is the next alternative.

Details about the specific steps of the Grievance Procedure can be found at the following link: https://policy.ufl.edu/regulation/4-012/

Students must first attempt to resolve the issue through their academic unit and then college. If the issue cannot be resolved, students may contact the Ombudsman for an appointment. Documentation must be provided of all formal actions taken to resolve the issue. The Ombuds is located at 31 Tigert Hall, 392-1308.
RESPONSIBLE CONDUCT OF RESEARCH

Integrity in scholarly work has received considerable attention in academic circles and the news in recent years. Some notorious fraud cases have made those in higher education sensitive to this issue. Some of these instances, especially in the sciences, have surfaced when attempts to replicate work failed. In the humanities and social sciences, plagiarism assumes greater prominence. Cheating, the bane of many high school and undergraduate teachers, resurfaces at the graduate level. Moreover, in our increasingly complex professional world, graduate students may be embroiled in confidentiality abuses or conflicts of interest. These problems are of significant concern to graduate students, faculty, and other graduate educators.

Although many graduate students will have few problems with the ethical decisions involved in maintaining integrity in their work, others may not see the issues so clearly. Some may even be unaware of the potential for problems with integrity in graduate study. The Graduate School has prepared these guidelines for units to be consistent should fraud, plagiarism, cheating, abuses of confidentiality, or conflicts of interest arise.

FRAUD

Fraud involves intentionally misusing data to conclude that the evidence may not be warranted. Falsification of results may take one of two forms: (1) fabrication of data or (2) omission or concealment of conflicting data for misleading other scholars. An intermediate form, especially in quantitative analyses, is challenging to detect when students are sloppy about categorization. All researchers, irrespective of discipline, can agree that data fabrication is fraudulent, and most will agree that the deliberate omission of conflicting data is also dishonest. However, a few scholars might argue that one person’s conflicting data is another person’s irrelevant data. In general, the best researchers come to terms with any piece of evidence that others may regard as conflicting. Strong support for a given hypothesis involves disposing of or dealing with alternative hypotheses.

The best insurance against fraud in graduate student research is careful and close supervision by the faculty advisor and exemplary behavior by other academic community members. The student should communicate regularly and frequently with their major professor. They can do so in various ways, such as submitting laboratory notebooks for frequent faculty review, having faculty monitor the student’s reading in the field, by regular progress reports to the faculty advisor, and so forth. Faculty should normally expect such communication; in the absence of faculty initiative, graduate students should initiate dialogues with faculty. Such communication will help the student develop intellectually and lessen the possibility of fraud. If a student is suspected of fraud, the academic community should handle the matter forthrightly and with apparent regard for the rights of the graduate student such that the career of a student researcher who may be innocent is not damaged. Similarly, if graduate student fraud is verified, it must be adjudicated in accordance with established University procedures. The Graduate School will provide information on those procedures to any interested party.

PLAGIARISM

Unlike fraud, which is usually the deliberate creation of false data or results, plagiarism is using another’s words, ideas, or creative productions or omitting pertinent material without proper attribution (i.e., without giving due credit to the original source). Flagrant cases of plagiarism may involve extensive borrowing of material from articles, books, or creative productions with perhaps only slight modifications. In such cases, penalties are usually severe for the student. They would likely result in
expulsion from Graduate School or, if a degree has already been earned, the rescinding of that degree. Less extensive plagiarism cases may be intentional or unintentional (e.g., carelessness or ignorance of the commonly accepted rules) but may also have severe repercussions. In using other people's work, one must cite that work in the text or, more commonly, in footnotes, and use direct quotations or skillful paraphrasing for all ideas that are not one's own. Since much of the basic information about our disciplines comes from outside ourselves through various sources familiar to all who work in a discipline, it is unnecessary to footnote those facts and ideas in the discipline's common domain. Otherwise, we would be footnoting everything we know. However, an intimate familiarity with the literature of the discipline, or a sub-discipline thereof, lets one know when another researcher's distinctive words or ideas should be given proper attribution. The fairly common practice among scientists is citing previous significant literature relating to the subjects of their articles or books, which safeguards against plagiarism. Still, such pertinent literature reviews are less common in the humanities.

Every graduate student should have a comprehensive knowledge of what constitutes plagiarism. Ignorance of the concept of plagiarism on the part of the student is no excuse for resorting to it at the graduate level, if indeed ignorance is an acceptable excuse at the undergraduate level. Graduate students who are confused about the concept should discuss plagiarism with faculty members. Students should expect faculty members to demand that they know what constitutes plagiarism. However, problems are not always associated with traditional perceptions of plagiarism. One of these is the danger, when borrowing from the works of others, of quoting, paraphrasing, or summarizing the material in such a way as to misrepresent what the author is trying to say. A second problem arises when a student is overly dependent on the work of another, even if it is cited meticulously. Still, another issue is plagiarizing oneself by submitting the same data or findings in more than one article or by reviewing the same book in two different journals. Finally, there is the problem of a graduate student's findings being used by their mentor without proper attribution to the student either in the article or book, indeed of not giving credit for joint or co-authorship in articles or books where the student does a substantial amount of the work. The student should discuss any perceived problem of this nature with the faculty member involved, the chair of the department, or, if need be, with the Graduate School.

In nearly all of these instances of plagiarism or variations, the best prevention is the example and consultation of the faculty advisor and the rest of the academic community, who should be sensitive to all of these nuances. Again, as with cases of fraud, University of Florida faculty should handle any suspicion of plagiarism with due regard to the student's rights, and any detection of plagiarism should be adjudicated in accordance with established University procedures. The Graduate School will provide procedural information on request.

**CHEATING**

Cheating at the graduate level may not differ morally from the same action at the undergraduate level. Still, many find graduate cheating more reprehensible, and the consequences, understandably, are more severe. Academic dishonesty for one whose presence in graduate school declares they have opted for the intellectual life is a serious matter. While cheating in the classroom is covered by regulations from other parts of the University, cheating on qualifying or preliminary examinations is not. Such dishonesty, once proven, will, at the very least, fail the examination and may mean termination of the student's enrollment.

**ABUSES OF CONFIDENTIALITY**

Abuses of confidentiality by graduate students can take various forms. Students often have access to thesis and grant proposals, data, or unpublished papers of other graduate students or faculty members.
Some students use this privileged material in their research without permission, even though proper attribution may be made. Such an abuse of confidentiality would include adapting into one’s research of a thesis or dissertation proposal or any unpublished work that one can read or adopt ideas first floated and not yet relinquished by someone else. Another example of an abuse of confidentiality is when the graduate student gains archival or library materials about living or recently living subjects and uses them in their research without permission from the library or archive or, in some cases, from the individual. Any research on live subjects can present similar dilemmas. Confidentiality is one of the forms of integrity, which is relatively easy to abuse and relatively difficult to detect. Once again, as with fraud and plagiarism, the example of the graduate student’s mentor and that of the rest of the academic community is the best preventive.

CONFLICT OF INTEREST

Conflicts of interest between graduate students and faculty members may arise in various ways. We have already alluded to the problems that can occur when a graduate student's research is inadequately acknowledged by faculty, either by failure to footnote correctly or to give co-authorship credit. However, another set of professional interpersonal relationships must be handled with great care if the integrity of graduate study is to be preserved. As continuing formal education becomes more common and academics become involved in the business world, the possibility of a business relationship between student and teacher becomes greater. All of us are familiar with the kind of conflict of interest that may arise through nepotism when a person serves in an administrative or supervisory relationship with those who are related to them by blood or marriage. Most universities have rules that try to regulate professional relationships in such cases. Many faculty members are reluctant to have their sons, daughters, or spouses take their courses for credit because others may perceive such students to have an unfair advantage. A business relationship, including consulting, must evoke the same kind of caution. A student should be careful about working for a company owned or administrated by faculty involved in the student’s degree work.

Similarly, a student should not date an instructor while the student is enrolled in the instructor's course. A student should not ask any instructor to serve as their thesis or dissertation director (or research committee member) if the student has or has had an intimate personal relationship, a family relationship, or a business relationship with that instructor.

If such a relationship should develop after a professional one has been established, the student should expect the instructor to remove him or herself from the professional role. Such a relationship, whether between a graduate student and a faculty member or between a graduate student acting as an associate instructor and an undergraduate, constitutes a potential conflict of interest, especially as perceived by other students and faculty members. Because of perceptions and the possibilities for exploitation, such relationships should be carefully avoided.

Dressing for Success

There is no doubt – to succeed, you must look like a professional executive. You want to be taken seriously. It would be best to differentiate yourself from undergraduate interns and less professional people. You want to go beyond the requirements to achieve a look that says “professional, together, capable, and ready to get the job done.” Besides, you never know when you will be in a meeting or class with a CEO or senior VP. Please pay attention to how the executives dress and model them.
One way to think about this is to dress like someone with your desired job. Some executives describe “business attire” as their “uniform” – just like the ones nurses and other employees must wear. Others have said, “If it’s trendy, it’s not professional.”

Building your professional wardrobe may require some time and money. You must spend time and money before your internship/job/fellowship begins. Always assume you will dress in conservative business attire – unless specifically told otherwise.

Remember, you can “be yourself” on the weekends and in your personal life. You can also insert your own “style” within these guidelines. In healthcare management, however, professional attire is not optional.

As a general guideline, wear business casual for class unless we have a guest speaker, which requires business formal. Business formal for presentations, networking events, tours, and department-sponsored events (unless stated otherwise). If you have questions or concerns about the dress code, please ask the MHA Program Director.

**General Rules to Follow:**
- Wear professional and conservative clothing. Your clothes need to be clean and should be pressed or ironed.
- Wear good shoes that are clean and polished.
- Your hair should be neat, out of your face.
- Choose accessories that complement your clothing rather than distract from it.
- Cover visible tattoos to avoid distraction.
- Keep fragrances and jewelry minimal.
- Keep your look classy but straightforward until you become accustomed to the environment and learn about the organization’s dress code.

**Clothing:**
- Fewer outfits of higher quality are preferred.
- You will need at least one good, conservative business suit.
- Never assume you can dress more casually than everyone else because you are a student.
- Never ask for a casual day or a break from the dress code.
- People will take you seriously if you dress professionally. Sometimes, you will not open your mouth in a meeting, but everyone will look at you (e.g., Board meetings, senior management meetings, etc).

**Also:**
- Use common sense…
  - No chewing gum
  - No hangover breath
  - No cell phone headset
  - No Airpods or headphones
